

1stSight

Transforming bodycam footage into actionable incident intelligence

1 PROBLEM STATEMENT

Each month, SCDF responds to multiple fire & medical incidents where **critical ground-level moments** are streamed on **bodycam**. But these moments are buried across long footage & separate records, **slowing live situational awareness & post-incident review**.

How might we **turn responder footage into live incident intelligence**?

2 SOLUTION SUMMARY

1stSight is an **AI-powered Command & Control dashboard** that converts responder bodycam footage into searchable incident intelligence.

DURING OPERATIONS

Detect key events

Build incident timeline

Suggest actions to Ops Centre

Highlight critical developments

AFTER OPERATIONS

Search incidents instantly

Retrieve supporting evidence

Review critical moments

Export structured reports

3 ARCHITECTURE DIAGRAM

4 UNIQUE FEATURE

LIVE INCIDENT ANALYSIS & OPERATIONAL RECOMMENDATIONS

From raw bodycam stream to actionable intelligence in real-time
